

Living Room Package:

Gecko has designed a Media package that utilizes the latest technologies which make controlling the system very simple and requires no training. First, you select a Media Package, and then a Custom Media Cabinet to compliment your decor and leave the rest to our team of experts. They will install the equipment beautifully; hide the wiring, mount the TV and surroundBar on the wall

The package includes a Marantz 1501 Surround Sound Receiver, a Polk Audio SurroundBar and Wireless Subwoofer, a URC IPOD Dock and Media Server, a Samsung BluRay Player; all flawlessly controlled by a Universal Remote MX880z communicating commands to a URC control processor MSC400. Also, with this package you will be able to adjust the light switches in the main areas of your home as well as the temperature. Blinds can be included in the system controls as well. The Flat Panel options consist of a 50" or 58" Samsung ultra thin Plasma or you can choose a 46" or 55" LCD, depending on the lighting conditions of the area. Our team will then mount the TV on the wall or integrate into your Media Cabinet. All you have to do is ***"Push Play, It's that easy"!***
